

Sinaloa Mothers Give Babies Away

CHOIX PEOPLE
ARE STARVING

Food Supplies Are Exhausted, Says Dr. Triolo, of El Paso.

BABIES are being given away by Sinaloa mothers in Choix, Sinaloa, to keep them from starving to death and traveling in that country are beset by the native mothers, who beg the strangers to take their children away with them so that they may not starve.

Dr. Gerardo Triolo, of El Paso, has returned from Choix, where his wife and 14 months old baby have been for the past six months, visiting relatives, while Dr. Triolo has been in charge of the Juarez hospital for the revolutionists. To reach Choix it was necessary to go to Hermosillo and then to Chihuahua by train. From Matamoros to Choix by coach and horseback by way of Cruz Piedra and San Blas. Dr. Triolo's baby had been ill and as soon as the Juarez hospital was closed, he left for Choix.

All Foodstuffs Exhausted. Dr. Triolo says that the conditions in Choix and other parts of the state of Sinaloa through which he traveled are almost impossible. He says that coffee, beans and other foodstuffs have been exhausted and none can be obtained as the railroads have suspended operation and it is impossible to get food into the country because the armies in the field prevent wagon trains from going and coming.

While Dr. Triolo did not see anyone eating knives and herbs, as reported in the American papers, he says that this would not be surprising as the people are desperate there and are starving by hundreds. He says that smallpox has added its horror to the desperate situation at Choix and many are dying from this plague.

At the nearest railroad junction points, the refugees are not permitted to leave on the trains for fear of spreading smallpox though the entire west coast country.

Red Cross Contribution a Pittance. Dr. Triolo says that \$500 which the American Red Cross has contributed for the relief of the suffering there will not begin to afford relief to the natives, as they are all out of food and have only a little corn meal left to live on, and in many places even this is exhausted and the people are depending upon the herbs and roots and the oil and garbage.

"Worst Place I Ever Saw." "Choix is the worst place I ever saw," Dr. Triolo said after his return from the Sinaloa town. "The suffering of the people, the great number of smallpox cases and the scarcity of food was something appalling. Mrs. Triolo and I were approached many, many times in Choix and on the road to Hermosillo by mothers who begged us to take their infants and give them something to eat. For our own little ones we were condensed milk in one of the towns and little of this. These people are in need of instant relief and the United States is the only country that can give it in time to do any good."

Saw Carranza and Turner. "We saw Carranza and Turner, including Tim Turner, of the Associated Press, at Hermosillo as we returned. They were going to Chihuahua overland. Coming back we could see the forts guarding Guaymas. The Mexicans are claiming over the bay from the federal fortifications."

BORDER CLAIMS ARE REFERRED TO MOORE. John Bassett Moore will pass on the border damage claims arising from the Madero revolution. Attorneys for the various claimants along the border have been notified by Washington that the Mexican revolutionary claims arising from deaths or injuries resulting from stray bullets have been referred to first assistant secretary John Bassett Moore of the state department. The assistant secretary is considered one of the world authorities on international law and the local attorneys who have war claims are much encouraged.

MEXICAN CONSUL HAS 10 SACKS OF MAIL. There are 10 sacks of mail waiting for the Mexican consul in postmaster T. A. Smith's office. Besides his own personal mail matter, the sacks contain mail for the federal officers and refugees here, which have to be distributed through the consul. With the arrival of the prisoners at Fort Bliss, any mail that they may receive will be sent to them through the Mexican consul Enrique de la Sierra. Some of the mail matter has been at the El Paso postoffice for months.

BAUCHE ALCADE EXPECTS TO LEAVE FOR FRONT. Col. Manuel Bauche Alcade, artillery commander of Villal's army, expects to leave Juarez soon for the front in southern Chihuahua. The case against him in a Los Angeles court was dismissed when he went there 10 days ago to appear for hearing. He was accused of complicity in the smuggling of an aeroplane from Arizona into Sonora.

Mexican Prisoners To Cost \$1 a Minute

Food Bill Alone of the Refugees Brought From Presidio Will Be \$1092 Daily; All Bought in El Paso.

By EDMUND E. BEHR.

PLAYING host—willingly or otherwise—to an army which has been driven from its native soil, Mexico, into the United States, is an expensive pastime. Witness: Uncle Sam, alias the American government, will have to dig down in his pockets and pay out the tidy sum of \$1499 every day for housing and feeding the 4500 federal prisoners and refugees who began arriving at Fort Bliss Tuesday morning from Marfa. In other words, it will cost the American people nearly \$1 every minute that the prisoners and refugees remain as "guests" in this country.

Feeding Is the Biggest Item. Feeding of the Mexicans is, naturally, the biggest single item of expense connected with the internment of the federal army and its 1067 women and children at Fort Bliss. With only a brief time for preparation to receive the prisoners, army officials here are facing the biggest problem that has yet arisen on the border. Every man in the commissary department's department at El Paso has been working overtime for several days in order to complete preparations for the care of the prisoners.

When the last of the ten trains used to transport the federal army and their camp followers from Marfa to El Paso, has unloaded its cargo of destitute humanity at Fort Bliss, there will be exactly 498 Mexicans in the prison camp. It is possible that two or more prisoners will be added to the list before that time, making the total an even 500. If the entire population of Tlaxcala, N. M., moved to El Paso in three days, this city would be facing the same problem that confronts the military authorities at Fort Bliss. There are 75 federal prisoners now at Fort Bliss. Of the thousands coming from Marfa, 2552 are soldiers and officers, and the remainder, 1067, are women and children.

Food Alone Is \$1092 Daily. It will cost approximately \$1092 a day to feed the prisoners, a total of \$27,795 a month. That they will be held here at least three months is highly probable, so the board bill alone will reach close to the \$100,000 mark. Although there is no basis from which to estimate every expense now, it is conservatively estimated by army men that the United States will have paid out at least \$150,000 before the "guests" are returned to their fatherland.

All Bought in El Paso. Conforming to the old saw, "It's an ill wind that blows nobody good," El Paso will benefit by the bringing of the prisoners here, even though the government loses money. Every pound of food consumed by the refugees, except bacon, will be bought from El Paso wholesale houses. The bacon is purchased in Chicago under a special government contract.

Nearly 25 cents a day, 25.5 cents to be exact, will be spent on every man, woman and child in the prison camp for food alone. Other expenses will be exacted, but estimates up to 25 cents daily. The monthly feed bill would build two structures like the El Paso Y. W. C. A. while the daily expenses money would buy one meal for two thirds of the total American population of El Paso.

Will Be Given Native Food. When will they eat? The prisoners themselves are probably more interested than their hosts in that question. They will be given the daily ration of their daily menu, with beans and chile running a close second. Military authorities have decided to give them their own food as much as possible. This is a departure from the usual custom, for up to this time Mexican prisoners have been served the regular American army rations, which rarely included chile or "frijoles."

The meat bill alone will total \$254 a day. Nearly 2400 pounds of beef a day will be served to the prisoners. About two and a half tons of flour will be doled out every day and the women who accompany the army will be allowed to cook it as they like. Army cooks will bake bread for the prisoners, but it is probable that four tortillas will be more popular. These will be cooked by the prisoners themselves. Bacon, 16 600 pound lots, will be served at each meal. If the prisoners desire it. The monthly bacon bill will total \$2540.

The inevitable cup of coffee will be given to each prisoner at every meal. This serving of the universal beverage will cost the government \$115 a day, or \$282 a month. The Chinaman's principal dish, rice, will be set down before the prisoners in 500-pound lots daily. "Frijoles" and chile peppers will be consumed at the rate of 1800 pounds every 24 hours, or about \$150 worth a day. Potatoes and onions are also on the bill at 1000 pounds of each weighed out every time the sun rises.

Sugar and Salt, 80¢ Daily. Sugar and salt, everyday necessities, will accompany each meal and Uncle Sam will pay out \$67 a day for these two items. Five hundred pounds of lard will be used daily, at a cost of approximately \$50 a day. Canned milk will be used at every meal, and 150 cans will be consumed every day. Cost, forty dollars. Nearly 500 pounds of prunes will be dealt out every 24 hours, while six gallons of vinegar will also be tapped.

Already the feeding of refugees has cost the government a small fortune. Maj. M. M. McNamee, who commands the border patrol at Presidio, was forced to purchase about \$6000 worth of provisions from Presidio merchants to feed the refugees while they were en route to Presidio; while \$500 worth of rations were sent to Marfa from El Paso to sustain the prisoners on their 68 mile march to the railway.

Tin cups, plates, knives and forks will be furnished to each of the prisoners. When they are returned to Mexico the eating utensils will be destroyed and the government will charge \$450 to profit and loss.

Use 11 Miles of Barbed Wire. Eleven miles of barbed wire will be used to fence the 48 acre area over which the prison camp is distributed. This fencing will cost the government \$700. Miles of copper wire—for the camp will be electrically lighted—will be strung by the military authorities. Running water will be distributed through the camp in pipes, and a miniature water system will be installed.

A "Stellar" Attraction

THE BRIGHTEST LUMINARY in the mercantile firmament is the great World of White which began here Monday. Universal interest seems to be centered in it. Observers tell us it is the most noteworthy attraction of its kind that has appeared in years.

Just as the pole star points out the north—or, as the Star of Bethlehem guided the three Wise Men—so does the "Popular" World of White point the way to economy. It is accepted by wise

women as the beacon light—guiding them to the Golden Gate of Opportunity.

It is right now in the zenith of its glory—mammoth assortments and plenty of each kind for all. So thorough was the preparation that tomorrow will be fully as good as Monday and Tuesday. All stocks will be reinforced from reserve—and if for some reason you were unable to come so far—there can be no regret. Here are some of the offerings, briefly stated:

Attractive Pricing of Undermuslins of All Qualities

WISE women will select the undergarments needed for summer wear in this sale. The assortments are complete and include garments of every quality. New and better values added to each lot, from our reserve stock.

Special Lots at 25c, 45c, 95c, \$1.45, \$1.95, \$2.45, \$2.95

Thirteen Grand Lots of Fine Embroideries Are Offered

IMMENSE quantities of high-class Embroideries, purchased especially for this sale. The values are by far the best ever offered. You must see the goods in order to appreciate the nature of the values.

4c, 9c, 12 1-2c, 19c, 23c, 35c, 45c, 79c, 59c, 69c, 98c, \$1.49 and \$1.95

The Wanted White Fabrics at Irresistibly Low Prices

LONGCLOTH—We purchase our Longcloth direct from the weaving establishment and mills, thereby saving a jobber's commission. All these materials are put up in 12 yard bolts and sold by the bolt at these White Sale prices. We invite comparison of quality and prices.

NO. 600—36 inches wide. Extra special value at 12 1-2c a yard. White Sale price, 12 yd. bolt. \$1.19

NO. 4700—Fine close weave, 36 inches wide. Best 15c yard value. White Sale price, 12 yd. bolt. \$1.48

NO. 2000—One of our best numbers, 36 inches wide. White Sale price, 12 yd. bolt. \$1.65

NO. 2500—Medium weight, 40 inches wide. A 20c yard seller. White Sale price, 12 yd. bolt. \$1.90

NO. 3500—Heavy weight, excellent for skirts, full yard wide. White Sale price, 12 yd. bolt. \$1.85

NO. 5000—36 inches wide, very fine, close weave, best quality. White Sale price, 12 yd. bolt. \$1.95

NAINSOOKS—Fine qualities soft finished, 19 and 12 yards in a piece, put up in a neat box. Sold only by the piece. Take a look at these values.

NO. 906—30 inches wide, very special 12 1-2c yard value. White Sale price, 10 yd. bolt. 95c

NO. 912—32 inches wide. Best 15c yard value. White Sale price, 10 yd. bolt. \$1.19

"PRIDE OF THE WEST"—36 inch sheer quality nainsook, suitable for dresses or underwear. White Sale price, 12 yd. bolt. \$1.39

"FAMILY" NAINSOOK—36 inches wide. A matchless value. White Sale price, 12 yd. bolt. \$1.59

NO. 2611—Our favorite, 36 inch, medium weight, 20c yard seller. White Sale price, 12 yd. bolt. \$1.75

"BRIDAL WREATH" AND "GRANDMA" NAINSOOK—36 and 40 inches wide. White Sale price, 12 yd. bolt. \$2.25

"CHIMOSA" NAINSOOK—Sheer quality, 42 inches wide. White Sale price, 10 yd. bolt. \$2.25

SHADOW CHECK NAINSOOK—32 inches wide, very sheer and fine. White Sale price, 12 yd. bolt. \$3.15

CROSS-BAR NAINSOOK—Soft finish—36 inches wide. Suitable for aprons, dresses and underwear. Regular 12 1-2c value. White Sale price, 10 yd. bolt. 95c

CROSS-BAR NAINSOOK—36 inches wide, close weave, fine check, 16c value. White Sale price, 10 yd. bolt. \$1.29

FRENCH CREPE—30 inches wide, permanent crepe, excellent for underwear of all kinds. Regular 15c yard seller. White Sale price, 10 yd. bolt. \$1.10

FRENCH AND SNOW-FLAKE CREPE—32 inches wide, beautiful weaves, soft finish. Regular 20c yard seller. White Sale price, 12 yd. bolt. \$1.35

INDIA LINON—30 inches wide, suitable for aprons, dresses, etc. Regular 8 1-2c yard value. White Sale price, 10 yard bolts. 45c

Everything points to a great crepe season both in white and colors. We are well prepared to meet the demand, and are showing a wonderful line of both domestic and imported novelty and plain crepes at pleasing prices.

CREPES—30 inch and 36 inch ratine stripes, lace stripes, satin stripes and shot figure crepe; very neat fabrics for white dresses. Values up to 35c. White Sale price, 25c

COTTON CREPE DE CHINE—Imported sheer white fabric, in novelty figure, stripe and lace stripe effects; 36 and 40 inches wide. A beautiful line of dress materials worth investigating. White Sale price, a yard. 75c
